Flutter Developer Intern

CodeXcelerate IT Consultancy

07/2024 - Present

Achievements/Tasks

- Developed and maintained mobile applications using Flutter with a focus on clean UI and smooth user experience
- Implemented real-time features including push notifications and background services
- Integrated REST APIs and Firebase for dynamic data handling
- Built reusable components to improve development efficiency
- Collaborated on building scalable app features and improving performance

SKILLS

Flutter

Dart

State Management

Git

GitHub

Firebase / Supabase

PROJECTS

Sovchi App (08/2025 - 11/2025)

- Developed a privacy-focused matrimonial mobile application using Flutter
- Implemented structured connection flow (no direct chat system) to ensure safe interactions
- Integrated Firebase Authentication for secure user verification
- Improved user privacy by enabling consent-based contact sharing

High – State Control (12/2025 - 02/2026)

- Developed a mental wellness app for mood, focus, and performance enhancement
- Designed guided state-based experiences (Vibe, Spark, Joy) for user engagement
- Built responsive UI with smooth user experience and intuitive navigation
- Enabled sleep sounds and guided meditation features for relaxation

Let's Barter (12/2025 - 04/2026)

- Developed a cash-free marketplace app for swapping and trading items
- Implemented real-time chat and bidding system using Supabase
- Built item listing and category-based browsing features
- Integrated push notifications for user engagement and updates
